

Making An
Impact on a
Child's Life

WE LISTEN. WE TEACH. WE CARE.

How to Get started:

Complimentary Initial Screening: An important initial step is to determine whether OT or ST is right for your child. Our initial screen determines whether further assessment or evaluation is needed based on your child's age and specific needs.

Evaluation: We offer a range of evaluations to determine your child's strengths and challenges.

Therapy Consultation: Treatment Goals are determined and therapy begins.

Therapy Tree, LLC is a private, family owned and run, multi-disciplinary Pediatric Therapy Practice. We offer Occupational Therapy (OT), Speech Therapy (ST) and related services. As THERAPISTS we understand the importance of evidence based treatment.

As PARENTS, we understand the importance of having positive and caring therapists to provide personal and individualized treatment to each child and education to each family.
